# Power Terminal Blocks

## General Information:

Barrier Style Power Terminal Blocks are available in eight sizes. They are identified by the first three digits of the catalog number. The 140, 142, 143, 144 and 145 series are manufactured with general purpose phenolic rated at 150°C. The 141, 132 and 133 series are manufactured with high impact thermoplastic rated at 125°C.

Enclosed touch proof power terminal blocks (EPB series) are available in three sizes (one listed, two recognized).

## Ratings and Standards:

The voltage ratings of terminal blocks are based upon the minimum spacing between electrically conductive parts line to line through air and over surface and line to ground through air and over surface.

### Class A

Service equipment including deadfront switchboards, panel boards, service entrance devices.

### Class B

Commercial appliances including business equipment, electronic data processing equipment and the like.

### Class C

General industrial and machine tool controls which can be further defined as equipment falling under UL 508. Ratings based on UL 1059 may be higher in some cases depending on application.

## Spacing Requirements\*:
