service life of aluminum electrical applications. Suspended zinc particles penetrate and cut aluminum oxide, while carrier material excludes air to minimize further oxidation. Provides additional inner-strand and inner-conductor current paths for improved conductivity and cooler connections. For use with pressure-type wire connectors including lugs, taps, service entrances and split-bolts. It is used with all types of pressure-type wire connectors.

Special Features

Anti-oxidant and anti-seizing compound improves efficiency and service life of aluminum-to-aluminum and aluminum-to-copper electrical connections; Suspended zinc particles penetrate and cut aluminum oxide; Provides additional interstrand and inter-conductor current paths for improved conductivity and cooler connections; Carrier material excludes air to prevent further oxidation; Reduces galling and seizing and promotes good ground continuity on aluminum conduit joints; Improves service life of aluminum ele
