APEL EMERGENCY LAMP, LED 2 ROUND HEAD

COOPER LIGHTING SOLUTIONS

Catalog Number	APEL
Manufacturer	COOPER LIGHTING SOLUTIONS
Description	3.6V, (2) .78W LED Emergency Light Head, equivalent to (2) 5.4W Incandescent Lamps
Weight per unit	2.4 (lbs/each)
Product Category	Emergency Lighting

Features

Fixture Type	Emergency Light
Lamp Type	LED
Number Of Lamps	2
Voltage Rating	120/277V
Wattage	0.47
Amperage Rating	0.06
Battery	True
Lumens	100

Dimensions and Weight

Size	10.1 IN Length 5.0 IN Width 2.25 IN Height

Descriptions

Description	EMERGENCY LAMP, LED 2 ROUND HEAD
Long Description	3.6V, (2) .78W LED Emergency Light Head, equivalent to (2) 5.4W Incandescent Lamps
Product Type	All Pro Emergency Light
Special Features	3.6V, .78W DC long lasting LED heads
Extra Long Description	ECL APEL ALL PRO EMERGENCY LIGHT

Manufacturer Information

Brand	ALL-PRO EMERGENCY
	Cooper Lighting Solutions
GTIN	00080083566501
UPC	783363

Taxonomies, Classifications, and Categories

Category Description	Emergency & Exit Lighting
Type	LED Exit and Emergency

Packaging

Carton	1
Package	8
Weight Per Each	2.4 (lbs/each)

2310 N. Stallings Dr.
Nacogdoches, TX 75964-0
Phone: 9365697941
Fax: 9365604685

Uses, Certifications, and Standards

Application	lighting
Mounting	Surface Mount
Standard	UL Listed - Damp Location

Sure-Lites

DESCRIPTION

The APEL is an UL 924 listed emergency light with a minimum of 90 minutes of run time and 17 feet of emergency egress coverage. Key features include LED heads, a no maintenance nickel cadmium battery and a five year fixture warranty. The LED heads are fully adjustable to maximize design flexibility while the compact form factor optimizes aesthetics. The universal j-box mounting pattern and snap fit housing construction significantly reduce installation time. The APELH2 versions have remote capacity capable of powering two additional APWR LED heads.

SPECIFICATION FEATURES

Electrical
- Dual Voltage Input 120/277VAC, 60Hz
- 240 VAC with 48 hour recharge time
- Line-latching
- Brownout circuit
- Low Voltage Disconnect
- Overload/Short Circuit Protection
- Test Switch/Power connector facilitates installation
- 3.6V, .78W DC Long Lasting LED Heads
- Remote capacity option (H2) powers two APWR remotes

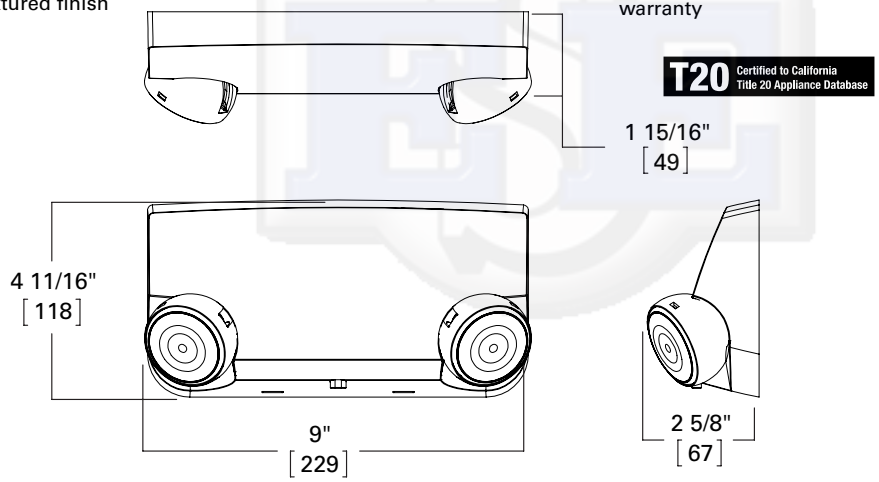

Housing Construction
- All components are injection-molded, color stable, high impact thermoplastic material
- Designer textured finish standard
- Components are of snap-fit construction to facilitate under 5-minute installation
- Reinforcing ribs throughout to provide maximum strength
- Suitable for wall or ceiling mount applications
- Universal J-box mounting pattern
- Keyhole mounting slots
- Aesthetically designed with a thin profile
- Available in white or black color

Battery
- Sealed nickel cadmium
- Maintenance-free, long-life
- Full recharge time: 24 hrs (max.)
- Polarized battery terminals

Code Compliance
- UL 924 Damp Location Listed
- Life Safety NFPA 101
- NEC/OSHA
- Most State and Local Codes
- Operating temperature range 10 °C to 40 °C
- California Energy Code compliant

Head/Lamp Data
- Long Life LED Emergency Heads
- Two heads standard
- Fully adjustable
- High impact thermoplastic
- Matches housing finish

Warranty
- Five-year warranty
- Seven-year prorated battery warranty

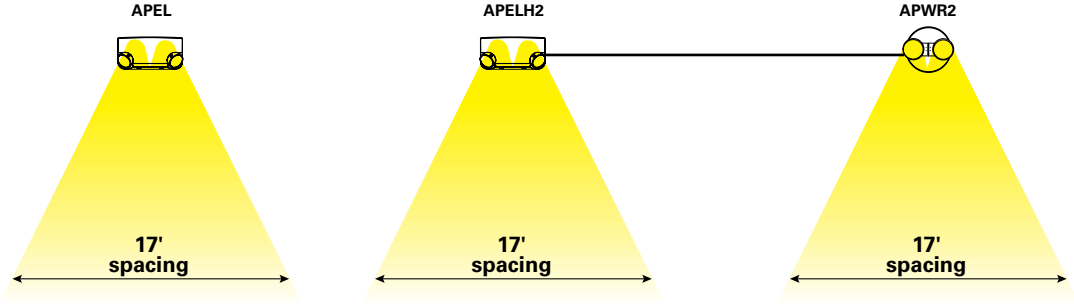

T20 Certified to California Title 20 Appliance Database

TECHNICAL DATA

LED Heads
The Long Life LED Emergency Heads are the most economical Emergency Light solution for general purpose applications. Designed specifically for emergency lighting applications with horizontal and vertical adjustment by rotating the LED Emergency Heads to desired direction.

Housing Construction
Rugged, durable, injection molded thermoplastic materials are used throughout the All Pro Series Emergency Lighting Units. All structural components are designed with reinforcing ribs to add additional rigidity and to maximize structural integrity. These materials are impact and scratch resistant, and they have been UV stabilized to resist discoloration due to age and ultraviolet radiation. All components are designed to be of snap-fit construction - no mechanical fasteners - to facilitate installation in under 5-minutes. The mounting plate has keyhole mounting slots and a universal mounting pattern for quick, efficient installation. Any components required for installation (wirenuts, wire leads, etc.) are all included with each unit. All APEL Series Units are suitable for wall or ceiling mount applications. Housings are available in white or black finish.

Remote Capacity
Remote capacity to drive two APWR 3.6 volt heads is available in the APELH2 and APELH2BK models.

Line-Latched
All Pro Emergency's line-latched electronic circuitry makes installation easy and economical. A labor efficient AC-activated load switch prevents the lamps from turning on during installation to a non-energized AC circuit. Linelatching eliminates the need for a contractor's return to a job site to connect the batteries when the building's main power is permanently turned on.

Solid-State Charger
Supplied with a 120/277 VAC, voltage regulated solid-state charger. Upon restoration of AC current after a power failure, the charger provides a high charge rate. The charge circuit reacts to the condition of the battery and alters the rate of charge in order to maintain peak battery capacity and maximize battery life. Solid-state construction recharges the battery following a power failure in accordance with UL 924.

Brownout Circuit
The brownout circuit in All Pro Emergency units monitor the flow of AC current to the unit and activates the emergency lighting system when a predetermined reduction of AC power occurs. This dip in voltage will cause most ballasted fixtures to extinguish causing loss of normal lighting even though a total power failure has not occurred.

Low Voltage Disconnect
When the battery's terminal voltage falls below 80% of the rated voltage, the low voltage circuitry disconnects the lighting load. The disconnect remains in effect until normal utility power is restored, preventing deep battery discharge.

Test Switch/Power Indicator Light
A test switch permits the activation of the emergency circuit for a complete operational system check. The Power Indicator Light provides assurance that the AC power is on.

Sealed Nickel Cadmium Battery
All Pro Emergency sealed nickel cadmium batteries are maintenance free with a life expectancy of 10 years. The sealed rechargable nickel cadmium battery offers high discharge rates and stable performance over a wide range of temperatures. The specially designed resealable vent automatically controls cell pressure, assuring safety and reliability. This battery is best suited for harsh ambient temperatures because the electrolyte is not active in the electrochemical process.

Warranty
All-Pro Emergency products are backed by a five-year warranty.
