

FAQ

1. Is this technology proven effective?

- Yes, the technology developed by Vital Vio® has been proven effective against bacteria, mold, and fungi. It has been scientifically proven and is trusted by healthcare systems across the country.

2. Is it safe to be in the room with the SurfaceShield™ mode on?

- Yes, the Surfaceshield™ antibacterial light is only harmful to bacteria, mold, and fungi cells. It has passed all UL testing for continuous human exposure.

3. How long does the violet light need to be on?

- We recommend continuous use for best performance. The SurfaceShield™ mode only draws 3.6 Watts of power. Continuous operation will cost less than \$4.00 per year.
