

# THE **SPACER**™ Cable Spacer

Non-Metallic

Holds up to Eight 14/2 Cables

**The SPACER™**, Arlington's new, non-metallic Cable Spacer holds power or low voltage cable secure and centered on a 2x4. Perfect for routing, fastening and positioning power or datacom cable, it holds a single or double row of up to eight cables securely between the forks.

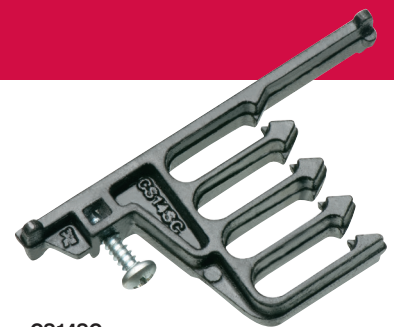

Installation is quick and easy. Just nail or screw **The SPACER™** to a wood or metal stud.

### Features and Benefits:

- Centers cable on a 2x4 stud
- Complies with article 300.4(D) of the 2020 NEC
- Holds cables individually, preventing heat build-up
