Plated Steel Fan/Fixture Box for New Work

MORE on reverse

Adjustable Mounting Bracket • Versatile On-Center Positioning

Flush to ceiling installation • Self-contained, no loose parts

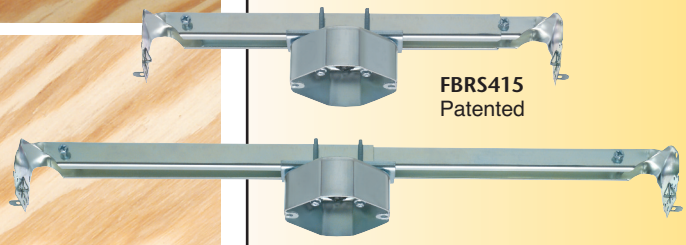

Arlington's plated steel box, with adjustable bracket, mounts fans/fixtures easily and securely between joists spaced 16 inches to 24 inches on center.

Designed for flush installation on ceilings up to 1-1/4" thick, FBRS415 ships ready to install on a 1/2" ceiling. For other ceiling thicknesses simply bend the bracket along the pre-scored line for 3/4", 1" or 1-1/4" ceiling depth.

Here's the innovative, *heavy-duty* alternative to bar hanger brackets that eliminates the fan wobble you can get with lighter products.

- UL/CSA Listed

Adjustable Bracket Length
Mounts between joists spaced 16" to 24" on center

FBRS415
Patented

- 15.6 cubic inch box ships ready to use with installed NM cable connector, mud cover in place and all mounting hardware secured in the assembly. *No bagged parts or pieces to lose!*
- For New Construction
- Meets Article 314.27 (C), 2017 NEC

UL LISTED

FBRS415 Plated Steel Fan/Fixture Box for New Work

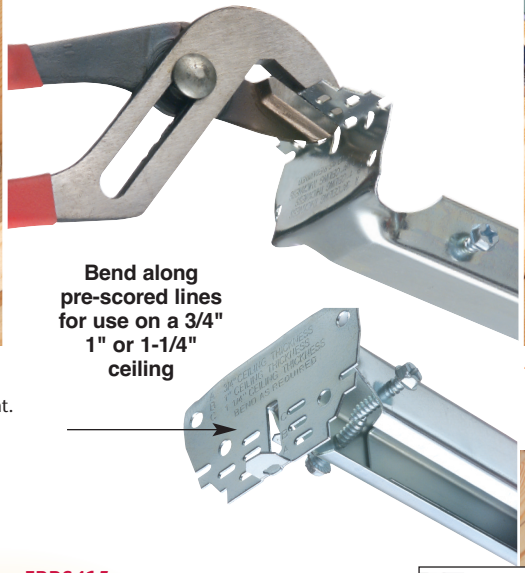

Adjusts to fit between joists spaced 16 to 24 inches on center

FBRS415 Installation

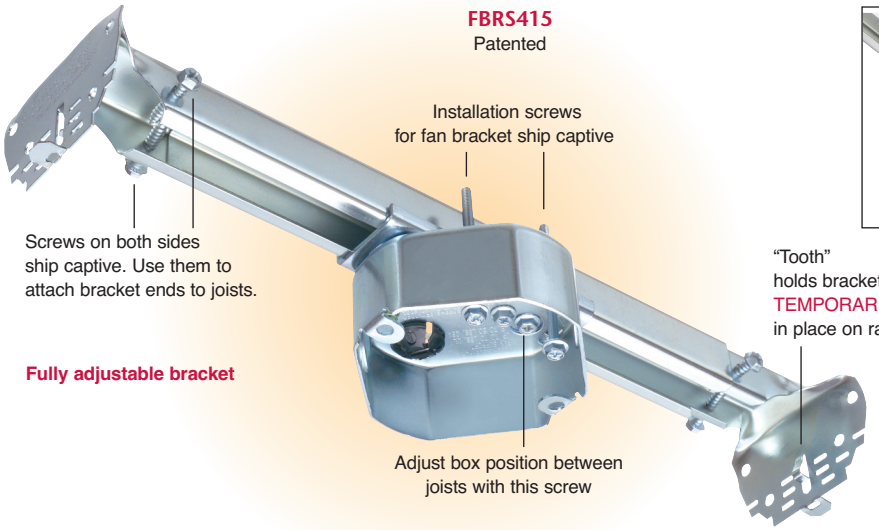

1 FBRS415 ships ready to install with a 1/2" thick ceiling. For a deeper ceiling bend bracket ends along the appropriate score lines as shown at right.

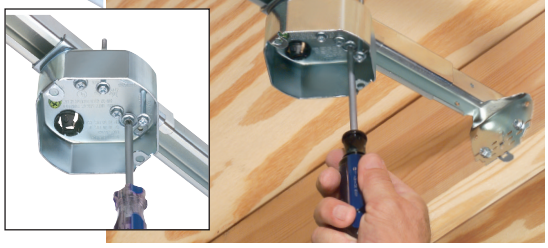

Tap in "tooth" on each end to hold bracket *temporarily* in place on joist/rafter.

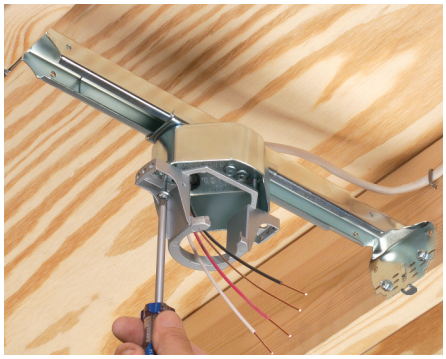

2 Remove screws from each side of bracket. Use them to attach bracket to joists.

3 Position box in desired position along joist.

4 Install mounting bracket with supplied screws.
