

LEDlescent™ CURVALUME® LED T8 U-bend Ballast-Free Lamps

Energy saving replacement for 32W T8 U-bend fluorescent lamps

- SYLVANIA LEDlescent CURVALUME LED T8 U-bend Ballast-Free lamps are a lightweight, energy saving alternative to replace traditional fluorescent T8 U-bend lamps by bypassing the existing ballast.
- Reduced energy usage saves operational costs, resulting in attractive payback time.
- These T8 U-bend Ballast-Free lamps provide instant light and a uniform light distribution.
- Easiest way to upgrade to LED technology.
- Engineered to operate directly on 120-277V, these lamps minimize labor and recycling costs.
- When installing the LEDlescent T8 U-bend lamps, the UL rating of the existing fixture is not voided (even when it is electrically modified), since our LEDlescent T8 U-bend lamp is UL Classified (as a luminaire conversion retrofit kit) under UL standard 1598C.
- UL 1598C standard covers LED retrofits intended for an existing UL rated fixture. Since the user is retrofitting with a UL 1598C classified LED kit, the installer must follow the installation instructions included with the lamps for the modified fixture to retain its UL rating.
- The full product family offering, in multiple color temperatures, covers a wide variety of applications.

Application Information

Applications

- Education
- General illumination
- Hospitality
- Office
- Retail spaces

Key Features & Benefits

- Installed directly on 120-277V; no ballast required
- CCT: 3000K, 3500K, 4100K & 5000K
- Long life: 50,000 hour life (L₇₀)
- 5 year limited lamp warranty (24/7 operation)
- Non-dimmable
- Power factor 0.9
- CRI: 80+
- G13 medium bi-pin base
- Long life lowers maintenance costs
- No warm-up time, instant-on with full light output and stable lamp to lamp color
- Suitable for dry and damp locations (cannot come in direct contact with water)
- Maximize energy savings with occupancy sensors
- For use with shunted and non-shunted sockets, therefore no socket change is needed
- Double ended platform where lamp is wired end-to-end preventing non-passive failure of a fluorescent lamp should it be inadvertently installed in the fixture

Application Information

Application Notes

1. All installation, inspection, and maintenance of lighting fixtures should be done with the power to the fixture turned off. Lamps should be installed and operated in compliance with the National Electrical Code (NEC), Underwriters Laboratories Inc. (UL) requirements, and all applicable codes and regulations.
2. Ensure lamp holders/sockets are in good operating condition before installation.
3. Sockets may be shunted or non-shunted. Tie socket leads together for non-shunted sockets as instructed in installation guide.
4. Not for emergency lighting.
5. Not to be used with dimmers.
6. LEDlescent is compatible with Philips Bodine ELI-S-20 Emergency Lighting Inverters and IOTA inverter models IIS-25-I, IIS-35-I, IIS-50-1, IIS125, IIS-375, IIS-550.
7. Do not use LEDlescent T8 U-bend lamps with external LED drivers or ballasts.
8. To prevent wiring damage or abrasion, do not expose wiring to edges of sheet metal or other sharp objects. Do not make or alter any open holes in an enclosure of wiring or electrical components during kit installation.
9. Suitable for use in dry and damp environments.
10. Please read and comply with all instructions before attempting inspection, service or installation.
11. For detailed warranty information, please see www.ledvanceUS.com.
