Non-metallic Combination Boxes!

LVD2 Power & Low Voltage Combo Box for New Construction

LVD2
Non-metallic,
Power and
Low Voltage
Combo Box

Patent pending

Easy installation – Nail or screw the LVD2 box to a wood or metal stud

Installing power and low voltage boxes? Try Arlington's non-metallic Combination Boxes.

LVD2 is the best way to install power and phone/cable outlets together, in one neat location in *new construction*.

Why accept this... when you can have a neat installation, like this.

Just nail the LVD2 to a wood stud, or screw

onto metal studs. Installation is fast and easy!

The low voltage side, for low voltage/Class 2 wiring includes combo 1/2" and 3/4" KOs for raceway.

LVD2 protects cable from damage – and it's the sturdiest box of its kind.

- UL Listed
- Competitively priced
- Ships ready to install with (2) nails in place

Catalog #	UPC/DCI/NAED Mfg. #01 8997	Unit/Std Pkg
LVD2	10957	25

Combination non-metallic, power & low voltage **combo box** for new construction.

for New Construction

LVDR2 Power & Low Voltage Combo Box for Existing Construction

Arlington's LVDR2 dual voltage, 2-gang box for retrofit work also installs power *and* low voltage outlets together in one neat location.

This 17 cu. inch box delivers a secure installation and adjusts to fit walls from 1/4" to 1-1/2" thick in existing construction.

As the mounting screws are tightened, the wings flip up, locking the box firmly in place.

The low voltage side, for low voltage/Class 2 wiring includes combo 1/2" and 3/4" KO's for raceway.

- UL Listed
- Competitively priced
- Ships with installed NM cable connector

Optional Wall Plates for LVDR2, LVD2 save time and money! Available in white or ivory. (See front of sheet for details).
