## Design features

- Provides compliance with 2017 NEC® Article 406.9 that states that all receptacles installed in wet and damp locations must be weather resistant
- Manufactured with the highest grade materials; durable impact-resistant thermoplastic face and back body is virtually unbreakable
- “TR” designation provides visual identification that device has tamper resistant shutters preventing insertion of foreign objects
- “WR” identifier quickly indicates during inspections that a weather resistant receptacle has been installed
- Terminal screws are backed out and ready to wire
- Extra-long and extra-wide mounting straps
- Patented built-in wire stripper for #14 and #12 wire to speed installation
- Side-wire terminals accept up to #10 solid or stranded wire
- Push-in terminals accept #14 solid wire (TWR270 duplex devices only)

### Applications

Weather resistant receptacles are constructed of enhanced nylon and corrosion resistant metal components for use in damp and wet locations. Installing these receptacles properly in an approved weather protective cover ensures compliance with 2017 NEC Article 406.9. Tamper and weather resistant receptacles add a UL listed safety shutter system that prevents the insertion of foreign objects into receptacles to the weather resistant devices. Installing these receptacles properly in an approved weather protective cover ensures compliance with 2017 NEC Article 406.9 and 406.12. Areas of application include: residential decks, porches, patios, garages and yards; commercial convenience outlets in damp or wet areas; residential, multi-family or commercial dwelling units; residential, multi-family or commercial pool and spa areas; indoor or outdoor public facilities and recreation areas.

TWR270

TWR S GF20

## Design features

- Provides compliance with 2017 NEC® Article 406.9 that states that all receptacles installed in wet and damp locations must be weather resistant
- Manufactured with the highest grade materials; durable impact-resistant thermoplastic face and back body is virtually unbreakable
- “TR” designation provides visual identification that device has tamper resistant shutters preventing insertion of foreign objects
- “WR” identifier quickly indicates during inspections that a weather resistant receptacle has been installed
- Terminal screws are backed out and ready to wire
- Extra-long and extra-wide mounting straps
- Patented built-in wire stripper for #14 and #12 wire to speed installation
- Side-wire terminals accept up to #10 solid or stranded wire
- Push-in terminals accept #14 solid wire (TWR270 duplex devices only)
